SUMMARY

Third-year Computer Science (Intelligent Systems) student with hands-on experience across the full development cycle: building web applications, deploying machine learning models, and manually testing every feature as a real user would. Delivered 4 live projects (3 in teams), including an NLP demo optimized from 5–10 s to 1–2 s response time and rated 3.2/4 by 10+ testers.

PROJECTS & PORTFOLIO

BanSos: Flood Risk and Community Reporting Platform | Frontend, Backend Support, Deployment, Testing
Team of 4 | TypeScript, Tailwind CSS, FastAPI, Supabase, Vercel | ban-sos.vercel.app

- Built frontend features (TypeScript, Tailwind CSS) for flood reporting and risk analysis, responsive on both mobile and desktop browsers.
- Contributed to integrating BMKG and government flood data to improve the accuracy of flood-potential assessment at specific locations.
- Integrated Supabase database features and supported FastAPI backend development so community reports and user data are managed inside the application.
- Helped deploy the dashboard on Vercel as a live web application and contributed to post-launch system improvements.
- Manually tested every input and feature end-to-end as a real user would, then fixed the issues found.

Boomer to Gen Alpha Style Transfer | Interface, Deployment, Testing
Team of 3 | Gradio, Hugging Face Spaces | huggingface.co/spaces/randyy18/boomer-genalpha

- Deployed an NLP text style-transfer model as a public web demo where users can try different text styles directly.
- Reduced response time from 5–10 s to 1–2 s (about 5x faster), making the demo practical to use.
- Tested the demo with varied text inputs, then collected feedback from 10+ testers (overall rating 3.2/4). Fixed the interface issues found along the way.

GrabCut Challenge | Deployment, Debugging, Testing
Team of 4 | Computer Vision, Vercel | computer-vision-segmentation-via-en.vercel.app

- Deployed an image segmentation (GrabCut) web application on Vercel so the computer vision project can be used online without setup.
- Tested the application flow and debugged frontend and backend issues to make it work reliably and supported team troubleshooting through development.

Personal Portfolio Website | Design, Frontend, Deployment, Testing
React.js, Tailwind CSS | randysalim.me

- Designed and built a responsive portfolio with React and Tailwind CSS that works across desktop and mobile, deployed on a custom domain.
- Tested layouts and links across desktop and mobile screen sizes before and after deployment.
- Indexed on Google with 222 impressions and 23 clicks (10.4% CTR, average position 7.3) from May to October 2026 (Google Search Console).

EDUCATION

BINUS University — Jakarta, Indonesia
Bachelor of Computer Science, Intelligent Systems – GPA: 3.4 / 4.00 — Sep 2024 – Expected 2028

Djuwita International School — Batam, Indonesia
Natural Science and Mathematics — Jul 2021 – Jun 2024

LEADERSHIP & ORGANIZATIONAL EXPERIENCE

Activist of Education - BINUS Blockchain & Crypto Club (BBCC) — Dec 2025 – Present

- Researched and published blockchain, cryptocurrency, and Web3 news updates for the 149-member BBCC news group.
- Developed educational materials covering blockchain fundamentals, cryptocurrency, and decentralized technologies.

Freshmen Leader and Freshmen Partner - BINUS University — Aug 2025 – Aug 2026

- Led a core team of 8 and managed a class of 50–60 freshmen, guiding them through orientation and their transition into university life.
- Facilitated communication and collaboration among freshmen to build a supportive and engaging environment.

Event Operations Registration - KELAS RUTIN Aug 2025 – Dec 2025

- Managed registration, verification, and on-site check-in for 40+ participants in a recurring class series running over 1–2 months.

Student Council President - Djuwita International School Mar 2023 – Mar 2024

- Led a student council of 40+ members, coordinating committees, students, and school stakeholders across school-wide programs.
- Planned and oversaw 6 major events: Prom Night, student orientation, Independence Day, Teacher's Day, Christmas, and Vesak.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C, SQL, HTML, CSS
Frameworks: React, Tailwind CSS, FastAPI, Gradio
Machine Learning: Transformers, PyTorch, TensorFlow
Testing: Manual functional testing, bug reproduction, debugging
Data: Pandas, NumPy, Google Colab
Tools: Supabase, Git, GitHub, Figma, Vercel, Hugging Face
Spoken Languages: Bahasa Indonesia (Native), English (Professional Working Proficiency)

CERTIFICATIONS

Microsoft Certified: Azure AI Fundamentals (AI-900) | Microsoft Mar 2026
Data Classification and Summarization | Hacktiv8 Indonesia Oct 2025
IBM Granite series: Data Classification and Summarization, Summarizing Data, Classifying Data | IBM Sep 2025

VOLUNTEERING

Teaching Volunteer - Kejar Siwali Nov 2025 – Dec 2025

- Supported students in understanding academic concepts through interactive and approachable learning sessions.
- Created a welcoming learning environment that encouraged students to ask questions, practice, and build confidence.
